CARELINE
One Heartbeat Away ®

FAMILIES & HOME CARE

REMOTE HEALTH EXAMINATION

A specialist's examination, *at home.*

For parents who find hospital trips exhausting, for long-term conditions and for recovery at home. A Careline care manager brings the eEVA™ CareStation to your door, and a PMDC-verified specialist examines live, from anywhere.

Careline · Pakistan & MENA
with 73Health Global, Finland · eEVA™ CareStation

THE CHALLENGE

Getting a specialist to an elderly parent is hard.

- Long journeys and waiting rooms tire elderly and unwell patients.
- Follow-ups for blood pressure, diabetes and heart conditions are missed.
- A video call can't hear the heart or look in an ear, so it often ends with 'please visit a clinic'.
- Children living abroad worry and have no easy way to arrange care.

OUR ANSWER

Careline brings the examination to the patient.

A trained care manager sets up the CareStation at home. The specialist joins live, guides every instrument, listens to the heart and lungs, looks in the ears and throat and reads measured vitals in real time. You get a digital prescription and a visit record, and your care manager stays with you afterwards.

WHAT'S INCLUDED

Everything a real examination needs.

Home examination
A full clinical exam at home, guided live by a specialist.

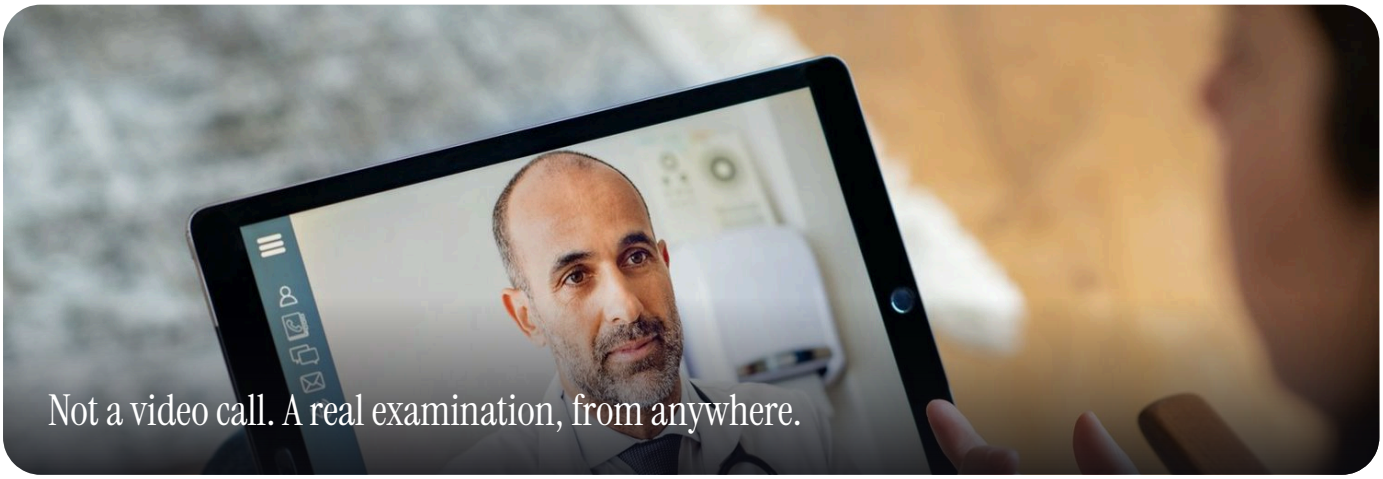

Care manager
One trained person who books, visits and follows up.

PMDC-verified doctors
Family medicine, internal medicine and specialists.

Measured vitals
SpO_2, pulse, temperature and blood pressure, not guesses.

Nurse & physiotherapy
Recovery, elderly care and long-term conditions at home.

Digital records
Prescription and visit record kept for every visit.

STEP BY STEP

How it works.

01

Message us

WhatsApp or book online. A care manager confirms the time.

02

We come to you

The care manager arrives with the CareStation.

03

Live examination

The specialist examines, listens and measures in real time.

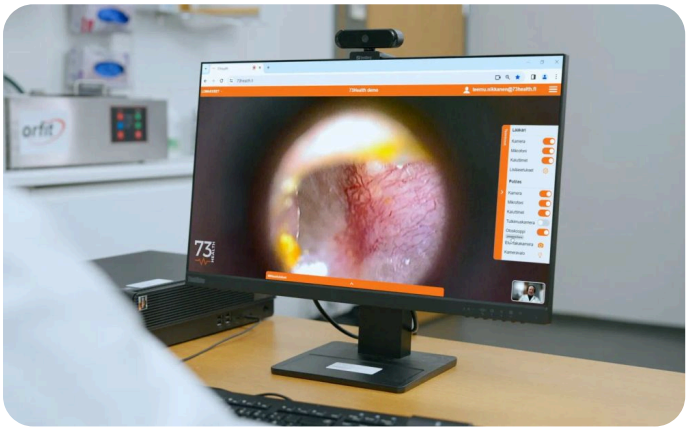

04

Prescription & follow-up

Digital prescription, record and a follow-up plan.

THE TECHNOLOGY

The eEVA™ CareStation.

The doctor's screen: the otoscope image, heart and lung sounds, measured vitals and the patient on camera, all live.

In every CareStation

- HD exam camera
- Otoscope
- Digital stethoscope
- Pulse oximeter
- Thermometer
- Blood pressure

Coming to the CareStation

- ECG
- Ultrasound
- PEF meter

WHY CARELINE

Built to be trusted.

Finnish technology

eEVA™ CareStation by 73Health Global, Finland.

DRAP licensed

Careline holds a DRAP licence for medical device import.

PMDC-verified doctors

Every specialist is verified and trained in RHE.

Trained care managers

Certified through the RHE Academy.

PROGRAMMES

Care that fits your family.

One-off home examination
When someone is unwell and a clinic trip is hard.

Regular follow-up
Scheduled visits for blood pressure, diabetes and heart conditions.

Recovery at home
Nursing and physiotherapy after a hospital stay.

Care for family back home
Overseas Pakistanis arrange and follow their parents' care from abroad.

QUESTIONS

Frequently asked.

Is this a video call?
No. The doctor examines with real instruments: stethoscope, otoscope, HD camera and measured vitals, streamed live.

Who comes to the house?
A trained Careline care manager who runs the CareStation and stays with the patient throughout.

Which areas do you cover?
Karachi today, with Lahore and more cities next. Message us to check your area.

Is it for emergencies?
No. In an emergency call 1122 or go to the nearest hospital.
